DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/16/2004 has been entered, as well as the amendment filed 7/20/2004 with the RCE. Claims 1-3, 6-20, 23-30, 32-34, and 36 are pending.

Allowable Subject Matter

Claims 1-3, 6-20, 23-30, 32-34, and 36 allowed. The following is an examiner's statement of reasons for allowance:

There is not taught or disclosed in the prior art a laser diode assembly where a laser diode is electrically mounted on a carrier, said laser diode having thermally conductive pads located on opposing sides of the top of the laser and first and second bonding members thermally coupling said pads to a thermally conductive layer on the carrier.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments filed 7/20/2004 have been fully considered and are persuasive. Particularly, the examiner is persuaded that the art of record is drawn to electrical conduction and not thermal conduction. While the Examiner maintains that these references disclose metal bonding wires and metal layers that necessarily will have some minimal amount of thermal conductivity, the Examiner believes that the broadest reasonable interpretation of "thermally coupling" and "thermally conductive" in light of the specification does not contemplate such minimal and poor thermal conductivity as these parts will have in the prior art. These terms instead mean something more, an actual amount of thermal conductivity that is neither poor nor minimal.

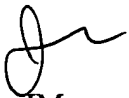

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James A. Menefee whose telephone number is (571) 272-1944. The examiner can normally be reached on M-F 8:30-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, MinSun Harvey can be reached on (571) 272-1835. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
